

CountEasy TS "the easiest way for counting tills"

The CountEasy TS is known for its easy handling and reliability. You will be amazed at how easily and quickly a cash drawer can be counted. The CountEasy TS is much more economical in purchasing and maintenance compared to conventional counting systems. In addition, the CountEasy TS weighing system works very quickly and efficiently and is easier to use when you think.

Unique and very distinctive is the ISW function. This makes it possible to process every count directly in your own cash-up program. No software is needed for this and linking is therefore possible with practically all systems!
